

CCMA SPECIAL INSPECTIONS and the IBC—CHAPTER 17 are now in effect in the Carolinas and the surrounding states for many public / significant building projects.

In order to better prepare those that are considering **taking the ICC Exam to attain Certification by the ICC as a Structural Masonry Special Inspector.** The Carolinas Concrete Masonry Association is offering a Special Workshop focused on such subjects such as:

ACI 530/ASCE5/TMS402, ASTM Masonry Standards

Reinforcement requirements

Blueprint reading and several other topics associated to the ICC Exam.

Required textbooks for the exam will be provided along with lunch and refreshments for both days.

The two day workshop is presented by **John Chrysler, P.E., Executive Director, Masonry Institute of America.** John has been practicing in the masonry industry since 1968 as a Contractor, Licensed Civil Engineer, Certified Structural Masonry Inspector. He has developed publications for the masonry industry based on interpretation of building codes and industry practice. The activities include involvement in the continuous development of national building codes and industry material standards. John has been and educator teaching Structural Masonry Inspection and an author of six books, including: Masonry Inspector's Workbook and Reinforced Concrete Masonry Construction Inspectors Handbook, based on the 2006 International Building Code.

CCMA is a registered AIA Provider. Learning units or PDHS will be given to architects and engineers.

The class is limited in size to the first 40 who register by October 15th. To reserve your materials, please send in your registration form
